A variety of habitats can be found in Jordan Scrub Sanctuary, a 354-acre protected sanctuary maintained by Brevard County's Environmentally Endangered Lands program. The sanctuary features beautiful natural landscapes such as scenic lakes, seasonal marshes, and scrubby flatwoods. While hiking through the sanctuary's diverse habitats, bald eagles can be spotted fishing for meals in the lake, and local scrub-jays seen foraging in the scrubby flatwoods.

*ACTIVITIES: Bicycle Trails Horseback Riding Trails Hiking Trails Wildlife Observation.*
